

Model GBS-100

### Features and Benefits

GBS-100 Glass Bead Sterilizer a convenient and provides effective way to quickly decontaminate your micro-dissecting instrument. No more need for messy chemicals or open flames in the lab, and the small footprint saves bench space.

Effective when rapid decontamination of micro-dissecting instrument.

The GBS-100 is a simple, inexpensive way to quickly decontaminate your micro-dissecting instruments between procedures. The unique stainless steel glass bead bath remains at a constant 250-265°C allowing you to insert the tips of your instruments whenever you wish to decontaminate them. And it's fast.... most micro-dissecting instruments decontaminate within 15 seconds! No messy chemicals and no need for open flames in the lab.

### The GBS-100 has the following features:

- Easy to use
- Fast, effective decontamination
- Small footprint saves bench space
- Durable design
- Perfect for micro-dissecting scissors and forceps
- 1 year warranty
